DETAILED ACTION

Election/Restrictions

Applicants arguments that the restriction be withdrawn or expanded is not found to be convincing.

Applicants compounds with all variables have so many permutations and combinations that they form **patentably independent and distinct inventions and also the search is very burdensome to the PTO.**

The restriction is made FINAL.

The double patenting rejection over US 6713487 has been withdrawn since applicants have provided a terminal disclaimer.

The rejection of claims 1-14, 16-19 under 35 USC 103 over US 5804578 also WO 97/36873 has been withdrawn since applicants have a proviso that excludes the prior art compounds.

The compounds to the **extent of the elected group** are allowable and hence the method claims 20-23 limited to the same scope are being rejoined.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 20-23 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant

art that the inventor(s), at the time the application was filed, had possession of the claimed invention. In re Wands, 858 F.2d 731, 737, 8 USPQ2d 1400, 1404 (Fed. Cir. 1988).

Regarding claims 22 and 23, the specifications do not have any support for any and all melanocortin receptor associated condition.

Compounds do not have an umbrella efficacy to treat any and all the diseases. Also drugs work in a lock and key mechanism and it is not clear which the conditions or diseases it would treat.

The specifications have not provided any guidance for these diseases. It is unpredictable which other disease may be effected or treatable by the melanocortin receptor at a future day and applicants claims covers disease not yet discovered to be treatable by the above receptor.

Regarding claims 20-21 need to be amended to include only the elected group.[delete the prodrug].

The specification do not have which other inflammation, immune disease, cardiovascular or neurodegenerative condition effective compound the applicants mean. The specifications also lack and synergism studies regarding the combination of these compositions.

Conclusion

Claims 1-14, 16-19 are objected to as containing non-elected subject matter.

Claims 22 and 23 are rejected.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 1625
